### **DETAILED ACTION**

Applicants' arguments, filed 8/30/04, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

### **NEW MATTER**

Claims 1-8, 11-29, 32-51, and 56 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1 has been amended to eliminate the computer implementation therein which broadens the claims thus adding NEW MATTER. Applicants point to the specification on page 4, lines 6-8, and the bridging paragraph between pages 10 and 11 for support as filed. Consideration of said page 4 citation reveals that the only method cited therein is a "computer-implemented" method. Thus, this does not support the generic method as now set forth in claim 1. Consideration of the bridging paragraph between pages 10 and 11 reveals that this citation is directed to the use and manipulation of "large databases" or "large data sets" neither of which are present in instant claim 1 nor claims dependent therefrom as limitation(s). Thus, said page 10-11 disclosure fails to provide written basis for the above noted NEW MATTER amendment.

Art Unit: 1631

Claims which depend directly or indirectly from claim 1 also contain this NEW MATTER due to their dependence. This rejection is necessitated by amendment.

**NON-STATUTORY SUBJECT MATTER**

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-8, 11-29, 32-51, 53, 54, and 56 are rejected under 35 U.S.C. 101

because the claimed invention is directed to non-statutory subject matter.

This rejection is reiterated and maintained from the previous office action, mailed 2/24/04. Applicants' amendment directed to outputting on an output device lacks a requirement for actual output of data. It is well known that output devices may or may not store data for output. For example, a diskette may be an output device which relays data to another computer for physical output later but does not specifically produce any graphical physical output itself.

No claim is allowed.

Applicants' amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1631

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

This application contains claims 9, 10, 30, 31, 58, and 59; drawn to an invention nonelected with traverse in the Paper filed 12/4/03. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
